

Firmex Single Sign On:

Manage Seamless and Secure Entry into Your Virtual Data Room

Every Firmex virtual data room (VDR) features Single Sign On (SSO) capabilities. By integrating with an identity management provider, Firmex users can verify their identity with a single set of credentials.* Easily control, manage, and restrict access to your VDR with SSO.

Control

Simplify user management and the VDR experience.

Easily Manage Users

- ✓ Manage user access from just a single location via your SSO/identity management provider.
- ✓ Eliminate the pain of managing users through separate apps.

Streamline the Login Process

- ✓ Improve the user experience by logging in through SSO.
- ✓ Make the need for multiple usernames and passwords a thing of the past.

Security

Gain an extra layer of security with SSO.

- ✓ Update your security through compatibility with the SAML 2.0 (Secure Assertion Markup Language) standard.
- ✓ Restrict a user's access to multiple VDRs through a single identity management provider.

Versatility

Easily integrates with your identity management provider.

- ✓ Set up in a matter of minutes by simply filling out a few fields.

Value

Implement SSO at no additional cost.

- ✓ SSO integration is included as part of a Firmex subscription.

Firmex's SSO Integrates with Major Identity Management Providers
